OTHER WORLD is a dance performance specially designed for a classroom. In order to give the children a new perception of a space they are very familiar with. We work with a specific light installation that we will bring with us and a soundtrack composed for the piece. The light system and the music system are provided by us and do not need any extra electric power.

SCHEDULE

Set-up and rehearsal: 4 -8 Hours

Length of the performance: 50 Minutes

Set down: 1,5 Hour

CLASSROOM

The classroom windows will be completely darkened.

We bring the necessary material with us: strips of fabric in different sizes and the necessary tape.

Depending on the type and equipment of the room, we may remove some furniture from the classroom for the duration of our stay.

A small storage space for cases and boxes is required.

LIGHT

We bring a complete lighting system based on the LED lights of the Philips HUE series. The light cue will be controlled from an iPad and an App with a remote control, that we will bring with us.

For the installation in the classroom we need the following material:

5x 10m Schuko

5x 5m Schuko

5x 2m Schuko

6x Triple Plug

SOUND

We bring our own sound system (HK Audio Lucas Nano).

An adapter cable is required:

Stereo mini jack on chinch.

STAFF REQUIRED

A patient technician who sensitively helps us darken the windows is needed.

The motto is: Carefully and calmly glue the blackout fabric once, replaces the repeated hanging up of fallen curtains!

We also need some assistance with installing light and sound. As well for the set down.
